Pick a Good Watermelon

It’s as easy as 1, 2, 3.

1. Look the watermelon over. You are looking for a firm, symmetrical watermelon that is free from bruises, cuts or dents.
2. Lift it up. The watermelon should be heavy for its size. Watermelon is 92 percent water. The watermelon should be heavy for its size.

Large bowl and spoon
Brown sugar or raw sugar
Small dolls or beach-themed toys

1. Wash watermelon under cool running water and pat dry.
2. On a cutting board, place watermelon on its side and cut off 1/4 to 1/2 inch from the stem end, being careful not to cut too deep into the white part of the rind. This will provide a sturdy base.
3. Using the dry-erase marker, draw a wave from the top of the watermelon halfway down, similar to a backwards C. Repeat on the other side to form a wave.
4. Use the knife to carefully cut away the part of the watermelon that you will not be using. Use the spoon to hollow out the watermelon, reserving the inside watermelon to cut up and serve.

5. Place the carving on a serving platter covered with brown sugar. Decorate with toys and shells and fill your carving with fruit.

Helpful Carving Hints
