

Watermelon Day

Suncatcher

Supplies

- Template
- Scissors
- Pencil
- Green and black construction paper or cardstock
- Red or pink tissue paper
- Green marker
- Clear school glue
- Scraps of dark green construction paper (optional)

Directions

1. Print templates and cut out.
2. Trace rind onto green construction paper and seeds onto black construction paper and cut out.
3. Cut small squares out of tissue paper.
4. Instruct kids to draw stripes on the rind (or glue dark green construction paper scraps to it.)
5. Next, show kids how to overlap the tissue paper squares, gluing them to the rind and other squares. Finally, kids can glue seeds on top of tissue paper squares.

Allow the suncatchers to dry completely before taping to a window.
